

Snowfall through Saturday February 1, 2011

An area of low pressure traveled through the Midwest and south of the Lower Great Lakes region on Saturday. This resulted in general accumulations of 2-5 inches across the Grand Rapids forecast area. Slightly higher totals were reported along and just north of I-94.

Observed snowfall

Note: The observed snowfall amounts used to create the map above were from a course network of trained observers. The map will not reflect all observations listed below. Actual snowfall totals in the above image may be higher or lower in specific locations. 48 hour totals were used to capture snowfall amounts that fell just prior to 7 a.m. on February 1, 2014. Only trace amounts of precipitation fell in the previous 24 period (January 31), which shows little to no change in the amounts actually received on February 1, 2014.
